

Islam Hadaya

Date of birth: 1 May 2007 | **Place of birth:** Aleppo, Syria | **Nationality:** Syrian | **Gender:** Male | **Phone:** (+963) 958359136 (Mobile) | **Email address:** hdayaaslam34@gmail.com | **Website:** <https://my-profile-personal-nextjs.vercel.app> | **Facebook:** <https://www.facebook.com/Islam.hadayaCA> | **X** https://x.com/eslam_hadaya | **LinkedIn:** <https://www.linkedin.com/in/islam-hadaya-60a056357> | **Pinterest:** <https://pin.it/3whXolZJZ> | **GitHub:** <https://github.com/eslam-cmd> | **Whatsapp Messenger:** <https://wa.me/+963958359136> | **Address:** Aleppo, Syria (Home)

● ABOUT ME

Adaptable and self-driven Full-Stack Software Developer with a solid technical foundation in Computer Informatics from Aleppo Vocational Secondary School. Experienced in crafting modern, user-centric web applications and responsive interfaces utilizing Next.js (App Router), React 19, Material-UI, and Tailwind CSS, coupled with robust backend APIs and PostgreSQL architectures. Passionate about bridging clean, intuitive UI/UX design with reliable system performance, and committed to pursuing rigorous undergraduate studies in Computer Science and Software Engineering.

● EDUCATION & TRAINING

1 Sep 2023 - 1 Jul 2026 - ALEPPO, SYRIA

TECHNICAL BACCALAUREATE DIPLOMA IN COMPUTER INFORMATICS - MINISTRY OF EDUCATION - ALEPPO VOCATIONAL SECONDARY SCHOOL

- Software Development & Programming Fundamentals (Algorithms, Data Structures, OOP)
- Web Application Engineering & Database Systems (SQL & Relational Databases)
- Computer Hardware Maintenance, System Architecture & Troubleshooting
- Networking Fundamentals, Operating Systems
- Applied Mathematics, Calculus & Analytical Problem-Solving
- Applied General Physics & Electrical Principles
- Applied Chemistry
- Technical English

Level in EQF: 4

● WORK EXPERIENCE

1 JUL 2025 - 1 MAY 2026 - ALEPPO, SYRIA

FULL-STACK STUDENT ADMINISTRATION & ACADEMIC ANALYTICS PLATFORM SELF-EMPLOYED / INDEPENDENT PROJECTS

- Engineered an end-to-end Student Administration Platform with Next.js 14 (App Router), Express 5, and PostgreSQL, featuring dedicated portals for teachers and students.
- Implemented robust security architecture: Two-Factor Authentication (OTP via Nodemailer), JWT sessions secured with HttpOnly cookies, bcrypt hashing, and brute-force protection.
- Hardened database operations using PostgreSQL connection pooling and strict parameterized queries to ensure data integrity and prevent SQL injection.

- Designed an interactive analytics dashboard utilizing Material-UI and Recharts for real-time visualization of student performance, attendance timelines, and grading distributions.
- Deployed full-stack application with live production preview and pre-configured demo credentials on Vercel.

Live Demo: <https://e-school-client.vercel.app>

Frontend Code: <https://github.com/eslam-cmd/e-school-client>

Backend Code: <https://github.com/eslam-cmd/e-school-server>

25 JUL 2026 - CURRENT - ALEPPO, SYRIA

SCANLENS — AUTOMATED WEB SECURITY SCANNER & VULNERABILITY ASSESSMENT PLATFORM

SELF-EMPLOYED / INDEPENDENT PROJECTS

- Engineered and launched ScanLens, an automated web security auditing platform utilizing Next.js 15 (App Router), TypeScript, NestJS, and Prisma ORM with PostgreSQL.
- Architected a multi-engine vulnerability scanner analyzing SSL/TLS protocols, HTTP security headers, CORS policies, and cookie configurations.
- Integrated AI-driven remediation workflows powered by Google Gemini API to generate contextual security recommendations and fix proposals.
- Implemented role-based access control (RBAC), multi-tier subscription gating via license keys, and JWT authentication with secure refresh token rotation.
- Built an interactive audit dashboard with Tailwind CSS, featuring automated PDF/JSON report exports, scan history, and administrative analytics.

Live Demo: <https://scan-lens-client.vercel.app>

Frontend Code: <https://github.com/eslam-cmd/ScanLens-client>

Backend Code: <https://github.com/eslam-cmd/ScanLens-server>

1 SEP 2026 - 10 SEP 2026 - ALEPPO, SYRIA

FULL-STACK FREELANCE PLATFORM & SERVICE MANAGEMENT SYSTEM

SELF-EMPLOYED / INDEPENDENT PROJECTS

- Built an end-to-end Freelance Management Platform utilizing Next.js 16 (App Router), React 19, and a Node.js/Express REST API with PostgreSQL.
- Implemented secure administrative authentication utilizing HttpOnly session cookies, OTP two-factor verification, Helmet headers, and API rate limiting.
- Engineered normalized database schemas using PostgreSQL connection pooling, tracking administrative audit logs, client service requests, and analytics.
- Created a responsive client storefront, markdown-powered blog, interactive admin dashboard, and automated Telegram alerts for instant request dispatching.
